

RAJ LAIYA

Frontend / Full-stack Developer - React.js · Vue.js

+91 6355705208 · rajlaiya2017@gmail.com · linkedin.com/in/laiya-raj · raj-laiya-developer-portfolio.netlify.app

PROFESSIONAL SUMMARY

Frontend developer with 1+ years building production-ready web applications using React.js, Vue.js 3. Delivered responsive, SEO-optimized UIs across e-commerce, and portfolio projects. Experienced with Redux Toolkit, Tailwind CSS, REST API integration, and component-based architecture. Currently expanding into TypeScript and backend development with FastAPI.

SKILLS & EXPERTISE

Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript, Python

Frameworks: React.js, Vue.js 3, Next.js

State Management: Redux Toolkit, React Context API

Styling: Tailwind CSS, Responsive Design, Mobile-First

Tools: Git, GitHub, VS Code, Vite, Vercel, Netlify

SEO & Performance: Core Web Vitals, Semantic HTML, Meta Optimization

EXPERIENCE

The Developers Arena | Junior Full-Stack Web Developer

May 2025 - Dec 2025

- Rebuilt company website using React.js — restructured component architecture for improved reusability and reduced render overhead, targeting **Core Web Vitals** compliance.
- Developed client-ready projects including a Honey E-Commerce site (Next.js + Tailwind CSS) and School Management portal (React.js), covering full UI from wireframe to deployment.

Code Alpha | Junior Frontend Developer

June 2024 - Dec 2024

- Designed and shipped 4+ responsive web tools from scratch, applying **mobile-first** design principles and cross-browser compatibility testing.
- Developed functional frontend applications including a real-time To-Do List with local state management and live DOM updates, demonstrating core JavaScript proficiency.

Kombee | Junior Vue.js Frontend Developer

Feb 2024 - May 2024

- Built and maintained client-facing web applications using **Vue.js 3** component-based architecture, contributing to a live production project.
- Created an Employee Organization Chart with dynamic data visualization using Vue.js, focusing on hierarchical rendering and usability.
- Identified and resolved UI bugs in a live application, improving stability and reducing visual regressions across breakpoints.

SELECTED PROJECTS

E-Commerce Honey Site | Next.js · Tailwind CSS | [Live demo](#)

Mar 2025

- Built full e-commerce frontend with Next.js — implemented product filtering, cart state via **Redux Toolkit**, and checkout flow with backend REST API integration.
- Optimized component rendering and scroll performance - Lighthouse Performance score 85 on mobile, 90 on desktop.

Software Company Website | React.js · SEO · Tailwind CSS | [Live demo](#)

Sept 2025

- Developed full-featured company website UI in React.js with reusable components, **lazy loading**, and semantic HTML5 for ATS and SEO compliance.
- Achieved Lighthouse scores of 95 Performance / 80 SEO / 95 Accessibility — optimized via code splitting, lazy loading, and semantic HTML5 restructuring.

Intern Management Portal | HTML5 · CSS3 · JavaScript | [Live demo](#)

Feb 2026

- Built without frameworks to demonstrate core JS fundamentals — DOM manipulation, event delegation, and localStorage-based state persistence.
- Delivered responsive Admin dashboard supporting 20+ intern records with **real-time filtering**, search, and status-based categorization.
- Achieved Lighthouse scores of 80 Performance / 90 SEO / 90 Accessibility - optimized via code splitting, lazy loading, and semantic HTML5 restructuring.

Real-Time Collaborative Whiteboard | React.js · Redux Toolkit · WebSocket | [Live demo](#)

in Progress

- Architecting real-time multi-user whiteboard with **WebSocket**-based state sync, routing, and animated canvas interactions using React.

Personal Portfolio | React.js · TypeScript · Tailwind CSS | [Live demo](#)

May 2025

- Developed portfolio with React.js and **TypeScript** — implemented dynamic routing, page transitions, and responsive layout with accessibility in mind.
- Achieved Lighthouse scores of 92 Performance / 92 SEO / 96 Accessibility - optimized via code splitting, lazy loading.

Food Delivery UI | Vue.js 3 · JavaScript · Tailwind CSS | [Live demo](#)

April 2025

- Built responsive food delivery UI using **Vue.js 3** component architecture - category filters, smooth animations, and performance-optimized mobile layout.
- Achieved Lighthouse scores of 95 Performance / 80 SEO / 92 Accessibility - optimized via code splitting, lazy loading.

EDUCATION

Government Engineering College, Bharuch

B.E. - Electronics & Communication

Aug 2021 - May 2024

CGPA: 7.37/10

Government Polytechnic, Rajkot

Diploma - Electronics & Communication

July 2018 - June 2021

CGPA: 8.45/10
